Testimonials

" From the minute Fraser started with us it was very clear that he is a very knowledgeable designer and has a good grasp of design methods and principals. I am very impressed by his skill-set in regards to prototyping and his deliverables are always of high quality. He has been a valuable asset to the project and he will certainly be missed come the time he progresses on to a new project or client. "

Anthony Tabram, UX Designer
Student Loans Company

" Fraser has worked hard to get himself into the position of Lead UX Designer, now overseeing all design work from an end-to-end perspective, through nothing other than hard work, the want to succeed and determination, and all within a very short space of time. Everyone in the team has nothing but good things to say about Fraser and that in itself is a true testament for the type of person he is. "

Peter Shopp, Product Owner
Student Loans Company
